

Dear Sir/Madam,

My name is Carlos Sirvent Mazarico, I am 23 years old and I am writing to express my interest in any role related with development that I could fit in your company. I like very much learning new technologies and it would not be a problem if it is something new for me. Please find enclosed my CV for your consideration.

As you can see in the attached CV, I have just finished working in an Internship in the MediaTech department in LNU, Växjö. I started working here in January 2015 and since then I have worked in different projects developing mobile apps (natively and cross-platform) and websites.

I have been studying in the Autonomous University of Barcelona for my bachelor and I have come to finish my thesis in Linnaeus University, where I have been able to improve my English level and start learning Swedish. The thesis that I did was titled 'Comparison between Native and Cross-Platform Apps' and it allowed me to learn about the pros and cons of using this new technologies. After the thesis I started two subjects in the Social Media and Web Technologies and I have been doing those while I worked part-time for the department.

Apart from this, I have tried to make my own business (www.hepeventos.com), although it is not working as I expected, and also I have done some mobile apps and websites for private companies.

As a person I am secure, calm and hard-working. I am good in team work and I like meeting new people. I think that with my initiative and enthusiasm I am the right person for you.

My intentions and goals would be earning experience all kind of development, and maybe learning new technologies. Also I would discover how it is like working in a company that is not software specialised, how is their architecture and which is the way the work is done. That way I will experience a new and different working environment.

With this opportunity I will reach all the goals above and also I will be able to meet new people.

Nowadays I'm living in Växjö but I have no problems in moving to other cities for job reasons

I look forward to receiving an answer from you soon.

Kind regards,

Carlos Sirvent Mazarico
